

Name: _____

Date: _____

I understand what object properties and actions are.

LessonID: 153

The word 'properties' is used to describe the features of an object, such as whether it is big or small. Properties can also be used to store values for the object, such as channel number for a television.

An object's actions are the things it can do, such as change channel.

Draw lines to match each object with its actions and properties.

Actions

Open CD Drive

Turn grill on

Make brighter

Volume Up

Apply brakes

Objects

Radio

Car

Oven

Light

Laptop Computer

Properties

Wheels

Brightness

Screen size

Temperature

Volume

Can you work out the different actions and properties for a bicycle? See how many you can come up with, recording your ideas in the correct box below.
