I understand how different types of loops can be used to repeat tasks.

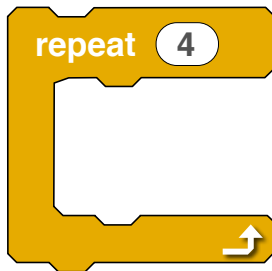

LessonID: 159

Loops allow us to repeat tasks within our programs.
There are three types of loop we can use.

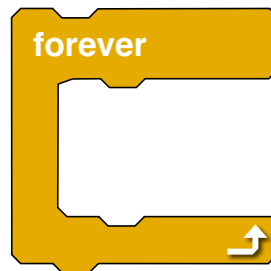

Repeat Loop

Use this when you know how many times you want to do something.

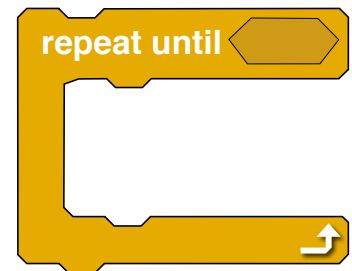

Forever Loop

Use this when you want to repeat a task forever.

Repeat Until Loop

Use this when you want to repeat a task until something happens.

Match the scenario with the most appropriate type of loop below.

Ask questions in a quiz until a player makes a mistake.

Rotate a fan left and right to cool a room.

Fire hundreds of rockets in a firework display.

Bounce a ball 7 times.

Repeat Loop

Forever Loop

Repeat Until Loop
