I can identify if a program meets a required brief

LessonID: 184

When programmers get drawn into coding and debugging, it can be easy to lose track of the original brief. As a result, some features can be missing, or not quite implemented correctly.

Take care to open the Scratch project at this website:  
[scratch.mit.edu/projects/23590254/](https://scratch.mit.edu/projects/23590254/)

Click 'See inside' to open the project.

What are the two main features detailed in the brief?  
Were they fully implemented in the program?

**Feature 1:** If the car.....

**Feature 2:** If the car.....

```

when clicked
  forever
    if touching color [green] ? then
      set speed to 1
    if touching color [grey] ? then
      set speed to 3
    if touching color [red] ? then
      set speed to 7
  
```

The missing feature belongs somewhere in this code. Draw an arrow to show where, then detail how you would add the feature.

To add the missing feature I would.....

.....  
.....  
.....  
.....  
.....
